

# Egedal

Netting Machine type Euro

Revolving console with two plastic-funnels.

Clamp hook, which pulls the trees through the funnels

# Egedal Netting Machine type Euro

**Mobile netting machine with simple and robust construction for netting of Christmas trees.**

Net-Let Euro needs to be connected to a tractor or the like for the operation of the hydraulic system of the machine plus for the transport of the machine in the plantation during the netting process.

Net-Let Euro is delivered with 2 plastic funnels as standard. The funnels have a diameter of 25 and 34 cm or 34 and 45 cm and are mounted on a revolving console, so that you quickly and conveniently can choose the right size of funnel. The plastic funnels are the well-known Net-Let funnels with a long, lenient entrance which compresses the trees without damage.

Also as standard Net-Let Euro is mounted with a clamp hook, which takes hold of the base of the trees, plus a combined three-point hitch and draw rod. Furthermore, Euro has a flow-regulator, that determines the feeding speed of the trees, and a knife for cutting through the net.

Accessories : working light, manual clip machine, carrier

## Technical data

Total length: 4300 mm  
Outer width: 1400 mm  
Draw length: 2150 mm  
Working height: 800 mm  
Oil consumption: 20 l/min.  
Weight: 320 kg
